

Thrift Savings Plan BULLETIN for Agency TSP Representatives

Subject: Implementation of Roth Thrift Savings Plan Contributions

Date: December 21, 2010

The Thrift Savings Plan Enhancement Act of 2009, Public Law 111-31, signed into law on June 22, 2009, authorized the Thrift Savings Plan (TSP) to add a Roth 401(k) feature to the plan. This benefit allows participants to contribute on an after-tax basis to their TSP accounts and receive tax-free earnings when they withdraw the funds (assuming certain criteria are met). The TSP Roth feature is similar to the private sector Roth 401(k) plans; please note that the rules governing Roth 401(k) plans differ from those governing Roth IRAs.

This bulletin provides agencies with the information and requirements they need to modify their human resource and payroll systems to accommodate TSP Roth contributions; it is targeted for the payroll offices and the agency personnel responsible for the development of the TSP election and contributions submission processes within the agencies. A separate bulletin will be issued shortly about the changes to the payroll office processing reports provided by the TSP. Bulletins regarding the communications strategy for introducing participants to the new Roth feature will be issued next year.

The Agency will publish regulations consistent with these requirements in the fourth quarter of 2011. The target date for the implementation of the TSP Roth feature is January 2012. Agencies should begin offering FERS and CSRS participants the opportunity to elect TSP Roth contributions, in addition to or in lieu of regular (tax-deferred) TSP contributions, on or after the first full pay period in January 2012 or as soon as administratively feasible thereafter. This benefit also applies to catch-up contributions for participants age 50 and older. Participants may not make TSP Roth contributions prior to the first full pay period in January 2012.

I. Definitions

- A. Agency contributions refer to both Agency Automatic (1%) and Matching Contributions. Agency contributions are always tax-deferred.
- B. Catch-up contributions refer to those contributions made by a participant age 50 or older who expects his or her employee contributions to reach the elective deferral limit. Catch-up contributions may be either regular (tax-deferred) or Roth (after-tax); they must be made from basic pay.

(continued on next page)

Inquiries: Questions concerning this bulletin should be directed to the Federal Retirement Thrift Investment Board at **202-942-1460**.

Chapter: This bulletin may be filed in Chapter 3, Eligibility.

- C. Employee contributions refer to both regular (tax-deferred) and Roth (after-tax) employee contributions.
- D. Regular contributions refer to the tax-deferred employee contributions contained in the participant's TSP account.
- E. Roth contributions refer to those after-tax employee contributions designated as Roth contributions by the participant; the Roth contributions are maintained as a separate balance within the participant's TSP account.
- F. Redesignation refers to the process of moving contributions which were erroneously submitted (due to agency error) as tax-deferred to the Roth balance or vice versa. The process includes the movement of the associated earnings.
- G. 5-year non-exclusion period. For purposes of this bulletin, this term refers to the two requirements for a qualified Roth distribution (withdrawal). That is, in order for the earnings component of a Roth distribution to be tax-free, the withdrawal must be made (1) after the end of the 5 year non-exclusion period (which generally starts with the first Roth contribution) and (2) after attainment of age 59½, death, or disability. Internal Revenue Code (IRC) § 402(A)(d)(A). The TSP maintains the start date for the period and determines whether a withdrawal is a qualified distribution.

II. TSP Roth Basic Rules

- A. Roth Contribution Rules
 - (1) Roth contributions:
 - (a) Are made on an after-tax basis from basic pay;
 - (b) May be made in addition to or in lieu of regular contributions; and
 - (c) Are subject to the elective deferral limit and must be combined with any regular contributions in determining whether the limit has been met.
 - (2) Participants age 50 and over may elect to make Roth catch-up contributions. All regular catch-up contributions and Roth catch-up contributions are contributed from basic pay and count against the catch-up deferral limit.
 - (3) Agency Automatic (1%) and Agency Matching Contributions:
 - (a) Are always tax-deferred (as are their earnings). There is no differentiation between matching contributions associated with regular contributions and those associated with Roth contributions.
 - (b) Agency Automatic (1%) Contributions are not affected by a participant's election to make Roth contributions.
 - (c) Roth contributions are added to regular contributions when determining the percentage of pay being contributed for purposes of the Agency Matching Contribution formula. Thus, the total amount of employee contributions (whether regular or Roth) is used for the formula.

- (4) The TSP processing rules for Roth contributions ***are the same as for regular contributions***. The same is true for catch-up contributions.¹ The only new function is the one to enable payroll offices to redesignate Roth contributions which were erroneously submitted (due to agency error) as regular contributions (or vice versa). (See Section IV below, Error Correction and Retroactive Pay Actions.)

B. Deferral Limit Rules

- (1) Elective deferral limit
 - (a) Like regular contributions, Roth contributions are considered elective deferrals and are subject to the IRC § 402(g) elective deferral limit.
 - (b) Thus, all employee contributions, whether regular or Roth, are added together to determine if the elective deferral has been reached.
- (2) Age 50 and over catch-up contribution limit (IRC § 414(v)). All catch-up contributions, whether regular or Roth, are added together to determine if the IRC's catch-up contribution limit has been reached.
- (3) The maximum that a participant (who is age 50 or older) can contribute is the sum of the elective deferral and catch-up contributions limits. Thus, if the IRC elective deferral limit is \$16,500 and the catch-up limit is \$5,500, a TSP participant may contribute:
 - (a) Up to \$16,500 in combined regular and Roth contributions;
 - (b) If age 50 or older, up to \$5,500 in combined regular and Roth catch-up contributions;
 - (c) For a combined total of up to \$22,000.
- (4) The existing edits for the elective deferral and catch-up contribution limits must be expanded to include Roth contributions.

C. Election Rules

- (1) The same rules apply to Roth contributions as to regular contribution elections. Thus,
 - (a) A participant may designate any whole percentage or whole dollar amount of basic pay as Roth contributions. This election may be in addition to or in lieu of an election to make regular (tax-deferred) contributions.

For example, a participant could elect to contribute 5% of basic pay as a Roth contribution **and** \$25.00 as a regular TSP contribution (or vice versa).

¹ Because the catch-up contribution process is basically the same as the regular contributions process, we have incorporated catch-up contributions by inference. Therefore, catch-up contributions are discussed only as they are distinguished from regular contributions (e.g., the contribution limit) or for specific emphasis (e.g., when all employee contributions must stop as a result of a financial hardship).

- (b) A participant who is age 50 or older may elect a whole dollar amount of basic pay as Roth catch-up contributions in addition to or in lieu of regular catch-up contributions. The participant will continue to be required to certify that he or she expects to reach the elective deferral (402(g)) limit for the year. Payroll offices should not edit for this condition.
 - (c) Payroll offices should continue to use existing processes for determining the actual maximum amounts which may be contributed in light of mandatory deductions (e.g., taxes, retirement deductions, health benefit premiums). See Section D below, Submission Rules, for the order of precedence with respect to TSP contributions.
- (2) Attachment 1 contains advance copies of the TSP election forms.
 - (3) At present, the law does not allow conversions of existing TSP regular balances to Roth balances.² If a participant elects to contribute a regular (tax-deferred) contribution to the TSP, he or she may not request that the contribution be changed to a Roth contribution (or vice versa) once the election is properly processed by the agency and the contribution is deposited into his or her TSP account. (The participant can always change his or her election for future contributions.)

If an agency determines, under the TSP error correction regulations, that it incorrectly submitted contributions as Roth and they should have been regular (or vice versa), then it may request the “redesignation” of those contributions without removing the contributions from the participant’s TSP account. See Sections H and IV.B below.

D. Submission Rules

The same submission rules apply to Roth contributions as they do to regular contributions and we expect that payroll systems will be able to leverage their existing programming to incorporate Roth contributions in their processing.

- (1) In the order of precedence, payroll offices should deduct regular contributions before Roth contributions. The same rule applies to catch-up contributions.
- (2) Agency Automatic (1%) and Matching Contributions will always be submitted on the regular (tax-deferred) payment records. This approach avoids trying to prorate the matching contributions between the regular and Roth payment records and simplifies error correction.

E. Makeup and Late Contribution Rules

- (1) The rules for processing Roth makeup and late contributions are the same as for regular makeup and late contributions. The “as of” date for either of these types of contributions is used for the 402(g) or catch-up contributions limit tests as appropriate.

² The law does allow separated participants and participants who are over age 59½ to withdraw TSP regular balances and transfer them to a Roth account (e.g., a Roth IRA). These participants must pay tax on the amount transferred for the year of the transfer. This feature has been available to TSP participants since February 2008.

- (2) Although the TSP is responsible for maintaining the start date for the 5-year non-exclusion period, payroll offices should be aware that the date will be reset by the receipt of a Roth contribution submitted either as a makeup or late contribution if the “as of” date on the record is earlier than the existing start date. For practical purposes, this will only impact the participant if the “as of” date of the contribution is in a year preceding the year of the first Roth contribution.
- (3) Additional information is provided in Section IV.A below.

F. Breakage and Negative Adjustment Rules

- (1) The breakage rules for makeup and late Roth contributions are the same as for regular contributions and catch-up contributions. Breakage amounts will be reported on the existing breakage reports. Payroll offices will be able to identify these amounts as associated with Roth contributions by the record number.
- (2) The current negative adjustment rules apply to erroneous Roth contributions, except for the treatment of positive earnings as described below. Consequently, as happens now for regular contributions, if the value of the Roth contribution being adjusted has declined, only the current value will be returned to the payroll office through the negative adjustment process. Roth negative adjustments will be reported on the existing negative adjustment reports. Payroll offices will be able to identify these amounts as associated with Roth negative adjustments by the record number.
- (3) The TSP must remove any positive earnings associated with erroneous Roth contributions from the participant’s Roth balance because Internal Revenue Service regulations prohibit any transaction that has the effect of directly or indirectly transferring value from a regular balance to a Roth balance (26 Code of Federal Regulations (CFR) § 1.402A-1, Q&A-13). Therefore, at the time the negative adjustment is processed, any positive earnings will be moved to the participant’s regular balance and treated as taxable regardless of whether they had originally satisfied the 5-year non-exclusion period. The movement of the earnings will be reflected as an earnings adjustment on the quarterly participant statement; it will not be reflected on the negative adjustment reports for the payroll offices.

G. Redesignation Rules

- (1) Inevitably, we anticipate that, because of agency error, a contribution will be deposited in the wrong balance. This may be a Roth contribution that should have been designated as a regular contribution or vice versa. Redesignation is the new process to be used to correct these errors. Although we have developed record formats that payroll offices can use to submit these corrections with their regular payroll submissions, payroll offices can also use the TSP Web-based data submission application to correct these errors.
- (2) Once the contribution has been redesignated, the payroll office must also ensure that the W-2 tax reporting reflects the change.
- (3) There is no breakage associated with the redesignation process.

- (4) As with a makeup or late contribution, the redesignation of a contribution may reset the start date of the 5-year non-exclusion period. However, the payroll offices should not track these changes.
- (5) Additional information is provided in Section IV.B below.

H. Financial Hardship Non-contribution Period

This rule has been expanded to include Roth contributions. Therefore, if the participant takes a financial hardship, all employee contributions – both regular and Roth (including all catch-up contributions) – must terminate for the 6-month non-contribution period. Once the non-contribution period has ended, the participant will have to elect to contribute again.

I. Tax Reporting Rule

- (1) Payroll offices are responsible for correctly tax reporting regular and Roth contributions on the W-2 consistent with the Internal Revenue Service's instructions.
- (2) For example, the 2010 IRS instructions provide that Roth contributions and Roth catch-up contributions are to be reported in boxes 1, 3, and 5, and as a single sum in box 12 using code AA.

III. Specific Implementation Guidance

A. Automatic Enrollment

Employees who are automatically enrolled in the TSP with three percent of their basic pay deducted for the TSP will default to regular (tax-deferred) contributions. The rules for submitting the Status Code, Status Date, and employee and agency contributions for these participants have not changed.

B. Current Participants

Employees with a current TSP election on file who do not submit an election to designate all or a portion of their employee contributions to the TSP as Roth contributions will keep their current regular (tax-deferred) election to the TSP. The rules for submitting employee and agency contributions for these participants have not changed.

C. FERS Participants Who Elect Roth Contributions

When a FERS employee elects to designate any portion of his or her employee contribution as a Roth contribution, the payroll office must follow the same steps as when submitting regular contributions. (See Section V for more information about the Roth records.) For example, if the employee has elected regular and Roth contributions, the payroll office must:

- (1) Submit the amount of the regular contribution on the TSP Current Payment (16) Record.

- (2) Submit the amount of the Roth contribution on the TSP Roth Current Payment (12) Record.
- (3) Calculate the associated Agency Matching Contributions using the total amount of regular and Roth contributions. Submit the Agency Automatic (1%) and associated Agency Matching Contributions on the TSP Current Payment (16) Record.
- (4) Change the TSP Status Code and Date as appropriate. (See Section III.F below, TSP Status Codes and Status Dates.)

D. CSRS Employees Who Elect Roth Contributions

When a CSRS employee elects to designate any portion of his or her employee contribution as a Roth contribution, the payroll office must:

- (1) Submit the amount of the regular employee contribution on the TSP Current Payment (16) Record.
- (2) Submit the amount of the Roth employee contribution on the TSP Roth Current Payment (12) Record.

E. CSRS to FERS Transfer

If a CSRS employee elects coverage under FERS, follow the instructions outlined above for regular and Roth contribution elections. Agency contributions begin effective the date of the FERS election and should be submitted on the TSP Current Payment (16) Record.

F. TSP Status Codes and Status Dates

- (1) The rules governing TSP Status Codes and Status Dates have not changed. However, agencies must check for both regular and Roth elections when determining the appropriate code.
- (2) For example:
 - (a) If the participant was automatically enrolled and elects Roth contributions, the Status Code would change from "A" to "Y" with the appropriate Status Date.
 - (b) If the participant was already making regular contributions, the Status Code (Y) and Date would not change because the participant was already contributing.
 - (c) If the participant was making both regular and Roth contributions and terminated his regular (or Roth) contributions, the Status Code (Y) would not change because he was still contributing. On the other hand, if the participant terminated both his regular and Roth contributions, the Status Code would change to "T" with the appropriate Status Date.

IV. Error Correction and Retroactive Pay Actions

- A. The introduction of the TSP Roth feature will *not* change the process agencies use to correct existing erroneous contribution situations because Roth contributions are treated the same as regular contributions.³ Refer to the TSP error correction regulations at 5 CFR § 1605 for additional information about the error correction process. However, for illustration, the following provides an overview of the actions to be taken in common error situations; refer to Section V for a list of the record types.

(1) Makeup contributions

When a properly completed TSP election is not processed timely, the employee may choose to make up Roth contributions just as he or she can choose to make up regular contributions. Follow the normal procedures for establishing a repayment schedule. As with regular contributions, because makeup employee contributions are not subject to breakage, the contributions must be reported on the TSP Roth Current Payment (12) Record. Although breakage will not be calculated on the employee contribution, the contribution will be attributable to the year identified in the “as of” date of the payment record for elective deferral limit purposes.

Any associated agency contributions must be submitted on a regular TSP Late Payment (46) Record, again with the appropriate “as of” date so breakage can be calculated.

(2) Late Contributions

When the payroll office must submit a late Roth contribution, resubmit one that had been previously submitted and rejected by the TSP, or submit retroactive TSP Roth contributions deducted from a back pay award or other retroactive pay actions, the contribution must be submitted on the TSP Roth Late Payment (42) Record with the appropriate “as of” date so breakage can be calculated. Any associated agency contributions must be submitted on a regular TSP Late Payment (46) Record, again with the appropriate “as of” date so breakage can be calculated.

(3) Removal of Erroneous Contributions (Negative Adjustments)

(a) Roth contributions that were erroneously deposited into a participant’s TSP account (e.g., the wrong amount was submitted, the participant received an overpayment, the employee was ineligible for the TSP) must be removed using the TSP Roth Negative Adjustment (22) Record. The same process for returning erroneously deducted employee contributions to the employee should be followed. Because these contributions were initially deducted on an after-tax basis, there is no change in their tax reporting status when they are returned to the participant.

³ The format of the breakage and negative adjustment reports associated with TSP error correction will be amended to incorporate the Roth contributions, generally either through the addition of a Roth line item or a label change. The record type field will also identify whether the associated contribution was regular or Roth, just as it currently distinguishes between regular and catch-up contributions.

- (b) Currently, when a negative adjustment record is processed to remove employee contributions, the participant is entitled to keep the positive earnings attributable to the amount removed. Participants will still keep any positive earnings attributable to contributions removed by a Roth negative adjustment record. However, the TSP will move those earnings to the participant's regular (tax-deferred) balance at the time the Roth negative adjustment record is processed. This action will be transparent to the payroll offices.
- (c) Agencies should not use the Roth negative adjustment/late contribution process to correct situations where contributions that should have been deposited by the agency as regular contributions were submitted as Roth (and vice versa). The TSP has established redesignation records, discussed in section IV.B below, to correct the tax designation of a Roth contribution that should have been deposited as a regular contribution and vice versa.

(4) Retroactive Pay Actions

No change has been made in the way these situations are handled.

- (a) *Situations where breakage is not paid.* Agencies may experience an instance where statutory or bargained pay raises are approved after the initial effective date. When the retroactive basic pay is paid to the affected employees, the agency will deduct the appropriate amount from the pay for the period covered by the retroactive salary payment.

The regular and agency contributions are reported on TSP Current Payment (16) records with the appropriate "as of" dates so the employee contributions can be associated with the relevant elective deferral limit year and breakage can be calculated on the agency contributions. Any Roth contributions are reported on the TSP Roth Current Payment (12) Record with the appropriate "as of" date for elective deferral limit purposes. Breakage is not paid on these Roth contributions.

- (b) *Situations where breakage is paid.* In a backpay award scenario, the participant is generally entitled to breakage on both employee and agency contributions. In these situations, the regular and Roth contributions should be submitted on their respective late payment records so breakage will be calculated on the employee contributions.

B. TSP Redesignation Records

- (1) The TSP has established redesignation records to correct agency errors involving contributions that a participant had properly designated on his or her TSP election form as Roth or regular, but that were submitted incorrectly to the TSP as regular or Roth respectively.

The redesignation record layouts, with header and trailer records, for payroll offices to complete and transmit to the TSP are included with this bulletin. Alternatively, the payroll offices may submit the redesignation request via the TSP Web-based data submission application. Payroll offices must also submit

the associated Journal Voucher, Form TSP-2-D, Certification of Redesignation of Records and Journal Voucher, with the redesignation record(s) (also included).

- (2) When an agency submits the redesignation record, it must provide the original contribution amount and the pay date of the original contribution. When the redesignation record is processed, the TSP will identify the erroneous contribution in the account and will not only redesignate the tax treatment of the contribution, but also ensure that the associated earnings are treated properly. (If a regular contribution is being redesignated as a Roth contribution, then the earnings on that contribution are subject to the 5-year non-exclusion period and may ultimately be tax-free upon distribution. Alternatively, if a Roth contribution is being redesignated as a regular contribution, then the earnings must also be treated as tax-deferred.)

The redesignation records allow seamless correction of these errors. They eliminate the need to submit a negative adjustment record to remove a contribution that was incorrectly deposited as regular or Roth and its resubmission as a late contribution. They also reduce the costs to the agencies, both in terms of making up investment losses that impact the amount of the negative adjustment that can be returned to the agency, as well as the breakage associated with the late contribution. Finally, they ensure that the participant does not receive earnings twice on the erroneous contribution – first as a result of the negative adjustment (because positive earnings will remain in the participant’s account) and again when the late contribution is processed.

- (3) Agencies are strongly encouraged to reduce the potential incidents of redesignations by using employee self-service TSP enrollment methods; this should eliminate the potential for agency data-entry errors. In addition, payroll offices may consider using the TSP Web-based application as the means of correcting these errors until they determine whether their error volume justifies an automated submission solution using the redesignation records.

V. Journal Vouchers, Records, and TSP Error Codes

- A. As indicated above, we have leveraged the existing journal vouchers, record layouts, and error codes to incorporate Roth contributions into our current submission process. The redesignation records are the only records that are brand new.
- B. Journal Vouchers and Header and Trailer Records
 - (1) The TSP Forms TSP-2 and TSP-2-G have been updated with fields for the Roth contributions and Roth negative adjustments being submitted. In addition, the associated trailer record has been revised to include Roth contributions.
 - (2) A new journal voucher, TSP-2-D, Certification of Redesignation of Records and Journal Voucher, along with the associated header and trailer records, have been developed for the redesignation process. These should be used if the payroll office decides to automate the process instead of using the TSP

Web-based data submission application.

- (3) Copies of the new journal vouchers and header and trailer records are at Attachment 2.

C. Roth Records

The following is a list of the Roth records. You will note that they parallel the existing regular (tax-deferred) records. Copies of the record layouts are attached to this bulletin.

TSP Roth Current Payment (12) Record
TSP Roth Late Payment (42) Record
TSP Roth Negative Adjustment (22) Record

TSP Roth Catch-up Contribution Current Payment (82) Record
TSP Roth Catch-up Contribution Late Payment (84) Record
TSP Roth Catch-up Contribution Negative Adjustment (25) Record

TSP Redesignation (90) Record – Roth to Tax-deferred
TSP Redesignation (91) Record – Tax-deferred to Roth
TSP Redesignation (92) Record – Roth Catch-up to Tax-deferred Catch-up
TSP Redesignation (93) Record – Tax-deferred Catch-up to Roth Catch-up

D. TSP Error Codes and Messages

- (1) Because the processing of Roth records is the same as for regular contributions, the Roth records have been incorporated into the existing error codes and messages.
- (2) New codes have been added for the redesignation process and for the updated trailer record. We have also added new codes specific to the Roth records (e.g., if the “as of” date of the Roth record is prior to January 1, 2012).
- (3) The Roth records have been added to the error code listing at Attachment 3; they are included under Record Type in italics. The new Roth-related codes are highlighted in yellow. A copy of the revised error codes listing (without highlights) is also available under the Payroll Office Tools in the Information for Agency Representatives section on the TSP website.

E. Miscellaneous Roth Earnings Adjustments (via the TSP Web-based data submission application)

The TSP Web-based data submission application is being updated to allow the payroll offices to submit Roth miscellaneous earnings. (Note that this function is very rarely used and is most often associated with a court-ordered settlement.) Because Roth earnings must have an attributable Roth contribution, the application will not process a Roth miscellaneous earnings adjustment unless there are Roth contributions in the participant’s TSP account.

VI. Employing Agency Responsibilities to Implement Roth TSP Contributions

Beginning the first full pay period in January 2012, or as soon as possible thereafter, agencies should offer FERS and CSRS employees the opportunity to make Roth contributions. Thus, agencies must:

- A. Modify their electronic TSP enrollment programs or other front-end applications to add Roth contribution elections from basic pay. Participants must be able to elect one, the other, or both types of contributions. To allow agencies to appropriately program their TSP election processes, advance copies of Forms TSP-1, Election Form, and TSP-1-C, Catch-Up Contribution Election, are at Attachment 1. These forms will be updated at the end of 2011 with the 2012 deferral limit information.
- B. Modify their payroll systems to allow for regular and Roth contributions (including Roth catch-up contributions). The TSP will accept properly formatted Roth records identified with an "as of" or process date on or after January 1, 2012. Roth records submitted with an "as of" or process date prior to the implementation date of the Roth feature will be rejected by the TSP record keep system.
- C. Provide information to their employees regarding the availability of the Roth feature and how it can be incorporated into their retirement planning. We will provide the agencies with additional information and materials about the Roth feature later in 2011 as the implementation date approaches.

VII. Federal Retirement Thrift Investment Board (Agency) Responsibilities in Implementing Roth TSP Contributions

The Agency will continue to provide additional guidance on the Roth feature to the agencies throughout the coming year. Agencies who wish to test their transmission of Roth records should contact their designated ATS Analyst who will coordinate with the Agency to receive and confirm the transmission of data.

THRIFT SAVINGS PLAN ELECTION FORM

TSP-1

Use this form to start, stop, or change the amount of your contributions to the Thrift Savings Plan (TSP).

Before completing this form, please read the *Summary of the Thrift Savings Plan* and the instructions on the back of this form. Type or print all information. **Return the completed form to your agency personnel or benefits office.** Your agency should return a copy to you after completing Section V.

Note: To choose your investment funds, see the instructions in the General Information section on the back of this form.

I. INFORMATION ABOUT YOU

1. _____
Name (Last) (First) (Middle)
2. _____
Street Address City State Zip Code
3. _____ - _____ - _____
Social Security Number
4. (_____) _____ - _____
Daytime Phone (Area Code and Number)
5. _____
Office Identification (Agency and Organization)

II. START OR CHANGE YOUR CONTRIBUTIONS

This election cancels any previous election.

To start or change the amount of tax-deferred or Roth contributions to your TSP account, enter **either** a whole percentage of your basic pay per pay period **or** a whole dollar amount per pay period for each type of contribution you elect. (You may choose a percentage for one type of contribution and a dollar amount for the other type of contribution. Read the instructions on the back.) Do **not** also complete Section III.

6. Tax-Deferred Contributions _____ .0% **OR** 7. \$ _____ .00
8. Roth Contributions _____ .0% **OR** 9. \$ _____ .00

III. STOP SOME OR ALL OF YOUR CONTRIBUTIONS

Do not complete if you have completed Section II.

To stop all or any portion of your contributions to the TSP, check the box in Item 10 that applies and complete Section IV. Your payroll contributions will stop no later than the first full pay period after your agency employing office receives this form. (If you are a Federal Employees' Retirement System (FERS) employee, and you stop your contributions, your Agency Matching Contributions will stop, but Agency Automatic (1%) Contributions will continue. Read the instructions on the back.)

10. I choose not to save for my retirement. Please stop my payroll contributions to my TSP account.
- Stop only my tax-deferred payroll contributions to my TSP account.
- Stop only my Roth payroll contributions to my TSP account.

If you are a newly hired (or rehired) employee, you can generally stop your automatic employee contributions before they start if you submit this form to your agency before the end of your first full pay period. (See note on back.)

INFORMATION AND INSTRUCTIONS

GENERAL INFORMATION

You may start, stop, or change your contributions at any time. Your TSP election will stay in effect until you submit another election or until you leave Federal service. (This form only applies to regular contributions. If you are age 50 or older and want to make or change catch-up contributions, use Form TSP-1-C, Catch-Up Contribution Election.)

Important note for new TSP participants: All contributions to your account will be invested in the Government Securities Investment (G) Fund until you direct the TSP to allocate your contributions differently. The TSP publication *Summary of the Thrift Savings Plan* describes all of your investment choices and discusses their risks and advantages. For more information, you can also obtain a copy of the TSP Fund Information sheets. (The most current versions of TSP forms and publications are available on the TSP website at www.tsp.gov.)

To choose your investment fund(s), use the TSP website (www.tsp.gov) or the ThriftLine at 1-TSP-YOU-FRST (1-877-968-3778; outside the U.S. and Canada, call 404-233-4400). On the TSP website, you will need your TSP account number (or user ID) and 8-character Web password. If you use the ThriftLine, you will need your TSP account number and 4-digit ThriftLine Personal Identification Number (PIN). If you are a new participant, your TSP account number, ThriftLine PIN, and Web password will be mailed to you (separately) after your account has been established.

If you change your address, notify your **agency** immediately to correct your records for your TSP account.

SECTION I

Complete all items in this section.

SECTION II

Your election will cancel and replace your previous election.

Do not complete Section III if you complete this section.

Complete this section to start your TSP contributions or to change the amount and type of contributions. You can elect to make tax-deferred and Roth contributions simultaneously. **Tax-deferred contributions** come out of your pay *before* taxes are calculated; you pay taxes on these contributions and their earnings when you withdraw them. **Roth contributions** are made from your pay *after* taxes, and the earnings grow in your account tax-free. You pay no taxes on your Roth balance when you withdraw it, as long as it has been 5 years since your first Roth contribution **and** you have reached age 59½ (or death or disability). **Note For FERS:** all agency contributions to your account are tax-deferred, even if they are matching your Roth contributions.

Complete **either** Item 6 **or** Item 7 (not both) for tax-deferred contributions; **either** Item 8 **or** Item 9 (not both) for Roth contributions. You may choose a percentage of basic pay for one type of contribution and a dollar amount (as little as \$1) for the other type of contribution.

If you choose a percentage of basic pay, your contribution amount will automatically increase when you receive a pay raise.

If you choose a dollar amount per pay period, your contribution amount will not increase when you receive a pay raise; you must submit a new Form TSP-1 to change the amount.

Contribution limit. The **total** of your tax-deferred and Roth contributions cannot exceed the Internal Revenue Code (IRC) annual elective deferral limit (xx,xxx in 2012). Since the elective deferral limit may be adjusted annually for inflation, check the TSP website, www.tsp.gov, to be sure that you have the most up-to-date limit amount (and the most recent version of this form).

SECTION III

Do not complete this section if you have completed Section II.

Complete Item 10 to stop all (or just one type) of your contributions. You may restart your contributions at any time.

FERS employees: Your Agency Automatic (1%) Contributions will continue after you stop your employee contributions, but you will no longer receive valuable Agency Matching Contributions. (If you restart your contributions, the matching contributions will resume.) You may change the way your Agency Automatic (1%) Contributions are invested even if you are not contributing to your account. You can use the TSP website or the ThriftLine, as described in "General Information" above.

Note for newly hired or rehired FERS or CSRS employees: As a new employee, your agency automatically deducts 3% of your pay, tax-deferred, and deposits the money in your TSP account for your retirement savings. If you want all or any portion of your automatic contributions to be after-tax Roth contributions, **you must complete Section II** and indicate what percentages or amounts you want as tax-deferred and Roth contributions. You can stop your automatic employee contributions before they start if you submit this form to your agency at the start of your first full pay period, subject to your agency's processing deadlines. If your agency has already begun to deduct your automatic employee contributions from your pay each pay period, you are entitled to request a refund of your initial contributions by submitting Form TSP-25, Automatic Enrollment Refund Request. The TSP must receive this form within 90 days of your first contribution.

SECTION IV

You must complete this section.

SECTION V

(To be completed by personnel or benefits office)

The Receipt Date (Item 14) is the date that a **properly completed** form is received by the agency personnel office. If the form has not been properly completed, it should be returned to the employee.

Requests must be processed immediately for new and rehired employees who want to stop automatic enrollment before it begins. This will help avoid a payroll deduction that may have to be refunded. The effective date (Item 15) should be no later than the first full pay period after receipt of a properly completed form.

You should provide the participant with a copy of this completed election for his or her records.

THRIFT SAVINGS PLAN CATCH-UP CONTRIBUTION ELECTION

TSP-1-C

Use this form to start, stop, or change your "catch-up" contribution election to your TSP account. You are eligible to make catch-up contributions **if you are age 50 or older** (or if you will become age 50 during the calendar year for which you are making this election), **and** you are already contributing a percentage or a dollar amount which will result in reaching the Internal Revenue Code (IRC) elective deferral limit by the end of the year. (See back of form.) Catch-up contributions will be taken from your basic pay each pay period and invested according to your most recent contribution allocation; they are in addition to your regular TSP contributions.

Before completing this form, read the information on the back. Type or print all information. **Return the completed form to your agency.**

My election will continue until:

- the end of the calendar year; or
- I reach the annual limit for catch-up contributions; or
- I submit a new election to stop or change these contributions.

I certify that I will make regular contributions to the TSP or an equivalent employer plan up to the maximum amount allowed by the IRS and TSP plan rules. I understand that my catch-up contributions are in addition to my regular TSP contributions.

INFORMATION AND INSTRUCTIONS

GENERAL INFORMATION

Catch-up contributions are in addition to your regular TSP contributions. Therefore, if you are not already contributing the maximum amount allowed by the Internal Revenue Code (\$xx,xxx in 2012) through your regular TSP contributions or by contributing to an equivalent employer plan (e.g., a 401(k) plan), you must elect to contribute the maximum amount before you are eligible to make catch-up contributions. This catch-up election **will not** affect your regular TSP contributions.

You may start, stop, or change your catch-up contributions at any time. Your election will stay in effect subject to the conditions in Section II below. You must make a new election for each calendar year.

You do not receive matching contributions from your agency for any catch-up contributions.

Your catch-up contribution election will be effective no later than the first full pay period after your agency receives it. Contributions will be invested according to your most recent contribution allocation on file. If you wish to change your contribution allocation, you may do so on the TSP website at www.tsp.gov, or the ThriftLine at 1-TSP-YOU-FRST (1-877-968-3778; outside the U.S. and Canada, call 404-233-4400).

SECTION I

Complete all items in this section.

SECTION II

Your election will cancel and replace your previous election.

*Do **not** complete Section III if you complete this section.*

Your contribution election. You can elect to make tax-deferred and Roth catch-up contributions simultaneously. **Tax-deferred contributions** come out of your pay *before* taxes are calculated; you pay taxes on these contributions and their earnings when you withdraw them. **Roth contributions** are made from your pay *after* taxes, and the earnings grow in your account tax free. You pay no taxes on your Roth balance when you withdraw it, as long as it has been 5 years since your first Roth contribution **and** you have reached age 59 ½ (or death or disability).

Contribution limits. The IRC limit for catch-up contributions is \$x,xxx in 2012. The **total** of your tax-deferred and Roth catch-up contributions cannot exceed this limit. IRC limits may be adjusted annually for inflation. Check the TSP website, www.tsp.gov, to be sure that you have the most up-to-date limit amount (and the most recent version of this form).

Deductions will be made from your basic pay in the dollar amount you indicate. However:

- (1) Catch-up contributions will stop when you have reached the maximum allowable dollar amount for the calendar year.
- (2) The catch-up contribution amount you specified cannot exceed the amount of your pay after all other required deductions have been made. (Required deductions include regular TSP contributions and TSP loan payments.)
- (3) Your catch-up contributions will **not** continue into the next calendar year.

You are not eligible to make catch-up contributions if you are in nonpay status or if you are ineligible to make TSP contributions because you have made a financial hardship in-service withdrawal within the last 6 months. If you have elected to make catch-up contributions and you subsequently enter a noncontribution period, deductions will stop. Contributions will **not** restart automatically. You must submit a new election when your noncontribution period ends.

You may stop your catch-up contributions at any time by submitting a new Form TSP-1-C to your agency indicating that you want your election to stop. (See Section III.)

You must sign this section or your request to start or change your catch-up contributions will be rejected.

SECTION III

If you choose to stop all or just one type of your catch-up contributions, you must complete and sign this section. Your election should be effective the first pay period after your agency receives it. You can restart your catch-up contributions at any time, subject to the conditions above. Do **not** complete this section if you have completed Section II. Your election in Section II cancels your previous election.

SECTION IV

The Receipt Date (Item 13) is the date that a **properly completed** form is received by the agency personnel office. If the form has not been properly completed, it should be returned to the employee.

The Effective Date (Item 14) should be no later than the first full pay period after receipt of a properly completed form.

You should provide the participant with a copy of this completed election for his or her records.
